APOE4 RNA editing

Activity × selectivity

RNA-seq evidence

Biological libraries → Editing profiles → Candidate sites

PUF recognition design

- **Historical CP models** — Five candidates tested
- **Current ESM ranker** — Variant ranking
- **Inverse folding** — Nominated variants

APOBEC catalytic design

AF3 hypotheses → Single mutants → Combinations → Assays

LAMAR site prioritization

RNA-seq labels + transcripts → Region scores → Cytidine ranking → Matched validation

Updated editing profiles
