A · CORPUS

RefSeq + RNAcentral

RNA sequence resources

Reduce redundancy

Sequence clustering

Pretraining corpus

~15 million genes / transcripts
Mammals + viruses

C · MASKED PREDICTION

RNA input

Mask bases

Encoder stack

Attention + feed-forward

Add & norm after each sublayer

Prediction head

Nucleotide probabilities

D · TASK-SPECIFIC FINE-TUNING

Splice-site prediction

Translation efficiency

IRES activity

RNA degradation rate
