EXPERIMENT

Sequencing Submission of ORCA-AAV Candidates

BRANCH	DATE	EXPERIMENTER
AAV	2026-09-20	Hansen Zhang

Experimental Summary

GFA-ORCA-AAV and CMV-ORCA-AAV candidates from the 19 September assembly were submitted for Sanger screening.

Results

Junction chromatograms were acquired on 21 September. Later internal reads acquired on 23 September identified an M132D difference in GFA-ORCA-AAV-1; the available reads did not verify complete plasmids.

PROTOCOL

M06: Colony Picking & Bacterial Culture
