EXPERIMENT

mCherry-AAV Transduction of HEK293T Cells

BRANCH	DATE	EXPERIMENTER
AAV	2026-09-27	Hansen Zhang

Experimental Summary

Ten microlitres of the mCherry-AAV preparation were added to approximately 10,000 HEK293T cells in one well for serial fluorescence observation.

Results

The treated culture entered the 24- to 120-hour observation period.
