EXPERIMENT

Genome qPCR of GFA-ORCA-AAV and CMV-ORCA-AAV

BRANCH	DATE	EXPERIMENTER
AAV	2026-10-12	Hansen Zhang

Experimental Summary

GFA-ORCA-AAV and CMV-ORCA-AAV preparations extracted on 3 October were assayed by genome qPCR using three lysate dilutions in technical duplicates. The run began late on 12 October and ended after midnight.

Results

Genome-copy estimates varied across dilutions, and late NTC amplification was observed. The assay measured viral genomes.

PROTOCOL

AA03: AAV Titer Quantification
