EXPERIMENT

Sequence Screening of ASO-Tagged Constructs

BRANCH	DATE	EXPERIMENTER
ASO	2026-09-25	Hansen Zhang

Experimental Summary

Sequencing results from the ASO-mCherry and ASO-ORCA construction were inspected.

Results

The archived reads supported the ASO-tag insertion in the candidate clones. The detailed review completed on 26 September favored ASO-ORCA-1 and ASO-mCherry-2, while retaining the incomplete ORCA coding-region coverage as a limitation.
