EXPERIMENT

First APOE4 Western Blot Assessment

BRANCH	DATE	EXPERIMENTER
Fundamental	2026-07-13	Xiaoyu Que and Muyin Guo

Experimental Summary

The subsequent APOE4 comparison was examined by Western blotting. APOE4 and total APOE readouts were assessed with the recorded controls and beta-actin.

Results

The blots supplied qualitative protein-level observations. A later repeat was performed to include His-tag detection.
