EXPERIMENT

RNA Preparation for the PUF-Length Comparison

BRANCH	DATE	EXPERIMENTER
Fundamental	2026-07-14	Hansen Zhang

Experimental Summary

Samples from the 10, 12, 13, 15, 132D and E72A editor conditions were processed through RNA extraction and reverse transcription, retaining the transient, PCOH1 and PCOH2 identities.

Results

cDNA samples were prepared for the subsequent APOE amplicon comparison.

PROTOCOL

M10: Reverse Transcription
