EXPERIMENT

Construction of GFAnoMRE

BRANCH	DATE	EXPERIMENTER
Gfa	2026-08-23	Hansen Zhang

Experimental Summary

The GFAnoMRE construct was prepared by PCR, homologous recombination, bacterial transformation and plating.

Results

The construction proceeded to plate submission on 24 August; Sanger chromatograms were acquired on 25 August.

PROTOCOL

M01: PCR

M04: Homologous Recombination

M05: Transformation & Plating
