EXPERIMENT

Co-transfection for the First Gfa/MRE Comparison

BRANCH	DATE	EXPERIMENTER
MRE	2026-08-19	Hansen Zhang

Experimental Summary

HEK293T and U251 cultures were co-transfected with the APOE4 reporter and the E72A, CMV, CMV+MRE or Gfa+MRE constructs for the first expression/editing comparison.

Results

The cultures supplied the qPCR and APOE sequencing workflow beginning on 21 August.
