EXPERIMENT

Reconstruction of P6 and P8 Mutants

BRANCH	DATE	EXPERIMENTER
PUF	2026-08-09	Xiaoyu Que

Experimental Summary

Twelve variants were rebuilt: P6-RGY, VFH, and WFQ, and P8-TTE, SHE, SRE, DWE, VTF, VWF, ETD, EWD, and EWH. PCR products were treated with DpnI, gel-purified, assembled at 50 °C for 15 min, and transformed.

Results

A new round of construction and plating was completed for the 12 variants selected after the earlier no-colony outcome.
