EXPERIMENT

PUF Culture Expansion and Re-streaking

BRANCH	DATE	EXPERIMENTER
PUF	2026-08-11	Xiaoyu Que

Experimental Summary

Cultures were prepared for P8-GVD; P6-QFW, QRW, TRQ, MHQ, and WFD; and P4-ETD, SHE, SNE, and VTF. Overgrown plates from selected P4, P6, and P8 groups were also re-streaked.

Results

Ten cultures were set up for plasmid preparation, and crowded plates were re-streaked for colony isolation. Plasmids from the ten listed cultures were extracted on August 12.
