EXPERIMENT

Plate Inspection and Sequencing Submission of the P1-P3 Batch

BRANCH	DATE	EXPERIMENTER
PUF	2026-08-31	Muyin Guo

Experimental Summary

The ampicillin-selective plates from the 30 August P1-P3 construction batch were inspected after overnight incubation and submitted directly to the sequencing company.

Results

Ampicillin-resistant bacterial growth was observed. The P1-P3 plates formed the first independent sequencing submission.

PROTOCOL

M06: Colony Picking & Bacterial Culture
