EXPERIMENT

Construction of the P3/P9 Mutant Batch

BRANCH	DATE	EXPERIMENTER
PUF	2026-09-01	Muyin Guo

Experimental Summary

Whole-plasmid PCR was performed for the second PUF12 mutagenesis batch targeting P3 and P9. PCR-positive products underwent DpnI digestion, gel recovery, recircularization, DH5α transformation, and ampicillin-selective plating on the same day.

Results

The second construction batch was plated for overnight incubation. Plate inspection and a separate sequencing submission followed on 2 September 2026.

PROTOCOL

M01: PCR

M03: Restriction Enzyme Digestion
