EXPERIMENT

Construction of the P9-P11 Mutant Batch

BRANCH	DATE	EXPERIMENTER
PUF	2026-09-02	Muyin Guo

Experimental Summary

The third whole-plasmid PCR batch targeted P9-P11 in the PUF12 construct. PCR-positive products underwent DpnI digestion, gel recovery, overlap-mediated recircularization, DH5α transformation, and ampicillin-selective plating on the same day.

Results

The third construction batch was plated for overnight incubation. Plate inspection and the third independent sequencing submission followed on 3 September 2026.

PROTOCOL

M01: PCR

M03: Restriction Enzyme Digestion
