EXPERIMENT

Review of Sanger Sequences from the PUF Mutant Batches

BRANCH	DATE	EXPERIMENTER
PUF	2026-09-04	Muyin Guo

Experimental Summary

Returned Sanger sequences from the three PUF12 construction batches were aligned to the parental construct. The designed substitutions and neighboring repeat regions were examined within the high-quality reads.

Results

The sequence review assessed the intended triplets, reading-frame preservation, and disqualifying changes in the covered regions.

PROTOCOL

M06: Colony Picking & Bacterial Culture
