EXPERIMENT

PCR and Ligation of ASO-Tagged Constructs

BRANCH	DATE	EXPERIMENTER
ASO	2026-09-22	Hansen Zhang

Experimental Summary

PCR and ligation were performed for the ASO-mCherry and ASO-ORCA constructs. The ligation products were transformed and plated to obtain candidates for sequencing.

Results

This construction workflow produced candidates whose sequencing results were reviewed on 25 September.

PROTOCOL

M01: PCR

M13: DNA Ligation Using T4 DNA Ligase

M05: Transformation & Plating
