EXPERIMENT

A-beta ELISA of CCF-STTG1 Culture Supernatants

BRANCH	DATE	EXPERIMENTER
FV	2026-10-13	Hansen Zhang

Experimental Summary

The culture supernatants collected before the CCF-STTG1 RNA samples on 2 October were assayed by A-beta ELISA. The plate was read at 450 nm using the retained sample and standard layout.

Results

The ELISA absorbance readout was acquired for the retained sample wells.
