EXPERIMENT

Reconstruction of Fourteen Failed Mutant Groups

BRANCH	DATE	EXPERIMENTER
PUF	2026-08-13	Xiaoyu Que

Experimental Summary

Fourteen mutant groups selected after failed plating were taken through another round of PCR, DpnI digestion, gel purification, assembly, heat-shock transformation, and plating.

Results

The reconstruction workflow was carried through to transformation and plating.

RELATED PROTOCOLS

M01: PCR; M02: Agarose Gel Electrophoresis and Gel Extraction; M03: Restriction Enzyme Digestion; M04: Homologous Recombination; M05: Transformation & Plating.
