EXPERIMENT

Plate Inspection and Sequencing Submission of the P3/P9 Batch

BRANCH	DATE	EXPERIMENTER
PUF	2026-09-02	Muyin Guo

Experimental Summary

The ampicillin-selective plates from the 1 September P3/P9 construction batch were checked after overnight incubation and submitted to the sequencing company as a separate batch.

Results

Bacterial growth was observed on the selective plates. The P3/P9 plates formed the second independent sequencing submission.

PROTOCOL

M06: Colony Picking & Bacterial Culture
